

GTP Product Lines

Why Global Telecom Partners

- GTP is an extension of the manufacturer working directly with the subject matter experts
- One place for all related technology needs
- Product lines with distinct synergies to solve problems
- Solutions fit together as complete solutions and/or complement existing solutions
- Over 150 years of real world expertise in all areas

Product Line Contents

- [Wireless](#)
 - Composite Poles
 - RF Analyzers
 - Network Simulation
- [Lab Solutions](#)
 - Traffic Simulation
 - Traffic Impairment
 - Traffic Analysis
 - Automation
- [Fiber/OSP Solutions](#)
 - Hand tools
 - Test Solutions
 - Infrastructure – MDU, SFU
 - GPON Analysis Solutions
 - RF over Fiber
- [Datacenter](#)
 - Fiber Cabling
 - Custom Signs
 - Pedestals, raceways, identification, enclosures
- Applications
 - [Wireless Solutions](#)
 - [Lab Automation, end point testing, UE testing](#)
 - [Enterprise Monitoring](#)

Product Line List – Wireless

Click on logo for vendor website

Designer and builder of RF Communications

- P25 Motorola Combiners
- Tower Top Amplifiers (TTA), all vendors
- RF Components

RS Composite Poles

- Reliable, modular, easy to transport
- Multiple colors and configurations
- Maintenance free, long life, easy installation

Wireless Test Solutions:

- Full range of wireless test solutions
 - Base station testers, cable antenna analyzers, Land Mobile Radio, Channel emulators

Wireless and Wireline Simulation, Emulation, and Conformance

- Conformance, feature, and load testing for VoIP, Wireless, and next generation networks (NGN).
- 2-5G Test Solutions for Wireless – Full Network Coverage
- UE Emulation, VoLTE Testing, IMS, RCS, PSTN, SIP

RF over Fiber Solutions

- High performance Analog RF to fiber trans
- Remote antenna, radar, government, broad satellite applications

Carrier-wide reporting, troubleshooting and analysis

- Deep-packet inspection, infrastructure and resource monitoring,
- Service level monitoring – LTE, 5G, VoIP, SS7
- NFV Powered!

Product Line List - Lab

Click on logo for vendor website

Wireless and Wireline Simulation, Emulation, and Conformance

- Conformance, feature, and load testing for VoIP, Wireless, and next generation networks (NGN).
- 2-5G Test Solutions for Wireless – Full Network Coverage
- UE Emulation, VoLTE Testing, IMS, RCS, PSTN, SIP

IP Network Emulators

- Reproduce the unfavorable conditions of IP Networks and WANs
 - Controllable and Repeatable lab environment.
- Recreates the dynamic behavior of the Internet such that any network model can be reproduced including those models

Layer 1 Switch for full lab automation:

- Up to 256 QSFP28 or 1024 SFP28; 1GB to 100GB; Protocol Agnostic
- Works with automation suites, reduces CAPEX
- Port-to-port Latency: less than 10ns (100Gbps)

Optical fiber spool solutions for network and link simulation

- Latency and optical time delay spools/coils
- OTDR training spool solutions with built-in events
- OTDR launch fibers

IP Load Simulation

- Layer 2-7 Gigabit Ethernet traffic generation and analysis test equipment
- Competitive priced, full featured traffic simulation solution – 1-100Gbps

Product Line List – Fiber/OSP Solutions

Click on logo for vendor website

Fiber Cleaning Solutions:

- Industry leading in fiber cleaning
 - Swabs, wipes, spray, kits
- Tools for all interfaces types

Fiber Test Solutions:

- Fiber Troubleshooting tools
 - OTDR's, Light source, Power meter, Video inspection
- IP Ethernet testers

High Density Polyethylene Pipe

- HPDE for direction drilling, trenching, micro-trenching, and plowing
- Variety of sizes along with custom options

Grounding and Cathodic Protection Solutions

- Corrosion proof, easy installation, improved network reliability
- Environmentally friendly

Wiring products

- Pedestals, raceways, identification, enclosures
- Raceway on a reel
- Quality solutions

Product Line List – Datacenter

Click on logo for vendor website

OEM Solutions upgrades (IBM, Dell, HP, Cisco, etc

- SFPs, memory, SSD, cables (Bend Fiber)
- Does **NOT VOID** warranty
- Huge cost savings

Network Time Solutions

- Modular design to fit many network applications
- End to end quality and industry leading engineering

VoIP Fraud, Security, Troubleshooting and analytics

- Realtime VoIP monitoring
- Multi-tenant capabilities

Datacenter, Headend, Central Office Solutions

- Full line of both fiber and copper cabling solutions
- Racks, cabinets, cable runway, aisle containment, and power distribution

Product Line Applications

Wireless Solutions from The Ground Up

Solutions for All Stages

RF Communications Solutions

- 700/800 MHz P25 Infrastructure
- Tower Top Amplifiers (TTA)
- 4/5G Mobile ~~data~~
- Monitoring and time synchronization

RF Composite Poles

- Reliable, modular, easy to transport
- Multiple colors and configurations
- Maintenance free, long life, easy installation

Grounding and Cathodic Protection Solutions

- Corrosion proof, easy install
- Improves network reliability
- Environmentally Friendly

RF Over Fiber Solutions

- High Performance Analog RF to Fiber converter
- Long Distance Transport
- Remote Antenna, radar, government, broadcast, satellite applications

Additional services:

- Kitting, staging and testing of equipment
- Custom RF solutions
- TAAS – Testing as a Service

Wireless Test Solutions:

- Field/Lab solutions for base station, cable antenna analyzers, spectrum analyzers
- Fiber backhaul solutions
- Full suite of emulation, simulation, conformance for 3-5G the lab testing

Product Line Applications

End Point Testing

Full Lab Automation:

- HW/SW Automation
- L4-7 Testing
- Analysis Solutions
- Network Impairment
- Protocol Testing

Full Wireless Testing

- UE and Actual Handset Testing
- Element emulation
- Protocol Conformance
- Feature Testing
- Load Testing

Enterprise Monitoring Applications

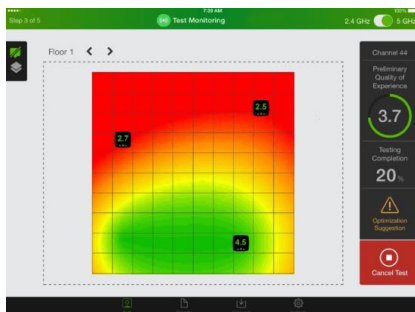

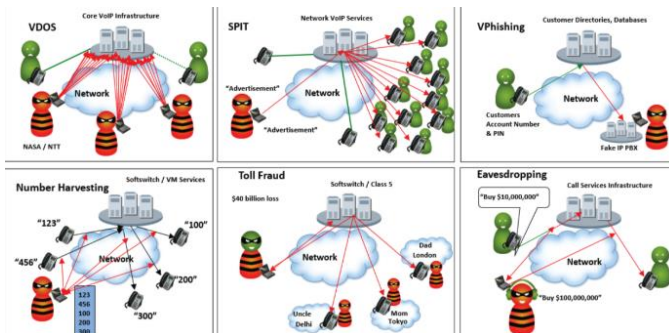

Complete Wireless Service Monitoring:

- Control and User plane service monitoring
- View in to virtual network elements
- Reporting, alarming, deep packet inspection

Fraud, Analytics, Security Monitoring:

- REALtime VoIP Fraud, Analytics, Troubleshooting

Data and Wifi:

- Big Data Monitoring
- Wifi readiness and troubleshooting
- Report and analytics
